

## **Dementia Resource Team - We are here for you!**

There is a Dementia Resource Team in Nyköping municipality. We work as a pilot by providing advice and support on dementia.

We are here both for those who have dementia and for those who are family members of someone with dementia.

The Dementia Resource Team consists of staff with special knowledge about dementia. The members of the team are subject to a duty of confidentiality and the services are provided free of charge.

### **What can the Dementia Resource Team do for you?**

- Provide advice and information
- Offer support calls and/or visit you at home
- Offer group meetings

### **Early intervention improves quality of life**

We know that early support interventions are of great value, not only for those who have recently been diagnosed with dementia but also for family members.

We will help put you in touch with a municipal assistance officer when you need to apply for one of the different services provided by the municipality.

### **What is dementia?**

Dementia is an umbrella term for a number of diseases and injuries that can affect brain function.

Dementia is not a normal part of ageing but is more common in old age.
